

LOCAL *Produce*

WORK WITH PRODUCE ALLIANCE TO BRING LOCAL TO YOUR DOOR!

We are passionate about supporting local farmers, educating on what local means, and helping to bring the highest quality local produce to your plate. Our mission is to aid our members and customers in sourcing locally grown produce as part of our sustainability strategy.

Different regions have a wide variety of outstanding local grower/shippers who are premier certified Food Safety farms.

Sourcing

Produce Alliance works with 100+ distributors nationwide that provide quality and locally sourced produce from over 2,000 farms from the fields of the grower to the plate of the consumer.

Sustainability

We partner with suppliers that employ sustainable practices such as crop rotation, energy conservation, pest management, waste & water reduction and recycling.

Commodities

The variation of commodities are endless from delicate microgreens to locally sourced squash from the Midwest. The amount of growers varies by region, but that does not stop our team from getting locally sourced produce to your door.
